

# HORTICULTURE CLIMATE NEWS

## UPCOMING EVENTS

Interested in using AI to reduce your farm's carbon emissions?

Acuicy is a new Halifax-based software platform that generates custom recommendations on a wide range of low-carbon options for companies to reduce emissions at the lowest cost to their business. They are offering a free 4-month trial of their software to 50 agri-food companies in exchange for feedback on our platform. If interested please contact [muhammad.koya@acuicy.com](mailto:muhammad.koya@acuicy.com) asap. This offer is only available until the end of March!

"What is Soil Health and what can it do for you"

Monday, March 25 -virtual presentation- 10:00 am – 10:30 am

A short presentation and Q &A focusing on soil health on horticulture farms in Nova Scotia by Dr. David Burton, a Soil Scientist and Professor in the Department of Plant, Food and Environmental Sciences in the Faculty of Agriculture, at Dalhousie University.
