ADAPTATION OPPORTUNITIES

CLEAN ANNAPOLIS RIVER PROJECT

Are you looking for ways to learn about and protect biodiversity on your property? The Clean Annapolis River Project currently has funding to conduct biodiversity assessments as part of the Agricultural Biodiversity Conservation (ABC) Plan Program as well as implement biodiversity enhancing activities - such as **planting shelterbelts, sowing herbaceous pollinator mixes, and restoring riparian areas - on farmland** in southwest Nova Scotia.

2 BILLION TREES

Nova Scotia is committed to planting 21 million trees as part of the national effort to plant 2 Billion Trees across Canada.

To support this effort, Clean Foundation is partnering with the provincial government on Nova Scotia's Thriving Forests. This program is using federal and provincial funding to develop tree planting initiatives across the province.

Interested in protecting your horticulture crops and reducing soil erosion? Go to:
