

# HORTICULTURE CLIMATE NEWS

## Climate Webpage Updated!

More resources have been added to the HNS climate webpage that we would like to share with you, including the water info session recording, see [here!](#)

## REAZENT FIELD TRIALS

Thank you to those who attended our virtual info session with Reazent on March 24<sup>th</sup>, 2026! The company is looking for field growers who would like to take part in field trials with its mineral-based soil amendment. This amendment has proven benefits for soil health and carbon capture. Please see slides [here](#) for more information and email [Brianna@horticulturens.ca](mailto:Brianna@horticulturens.ca) if interested!

## LATEST EVENTS

### Horticulture Invasive Species Event

Our appreciation to those who attended our invasive species event on February 5<sup>th</sup>, 2026, at the Super 8 in Windsor!

You were such an engaged audience and sparked great discussions about the future of invasive species in horticulture with climate change! Please visit the climate webpage linked above to see resources added from this event!

### “All About Water” Info Session

Thanks to all who attended our “All About Water” info session at the Brooklyn Fire Hall on February 26<sup>th</sup>, 2026!

Please see climate webpage linked above for the recording and other resources!
